

THE FULL STRAWBERRY MOON  
JUNE 2020

In the evening of **Friday, June 5**—just after sunset—look towards the southeast to watch the full Moon rise gently above the horizon. There, it will appear large and golden hued.

WHY IS IT CALLED

THE FULL STRAWBERRY MOON?

June's full Moon—typically the last full Moon of spring or the first of summer—is traditionally called the **Strawberry Moon**.

This name originated with Algonquin tribes in eastern North America who knew it as a signal to gather the ripening fruit of wild strawberries.

Alternative European names for this Moon include the **Honey Moon** and the **Mead Moon**. It has also been called the **Rose Moon**, given that many roses come to life during this part of the year!
